Since the launch of KEE-Suites in October WIB staff no longer have direct access to Business Objectives which has created problems when gathering the data for specific section of the report. The BSC Committee recommended making changes to that portion of the report using local data instead of state-wide data. The WIB staff has requested from the state direct/indirect access to the state employment and wage data system. The state is not willing to give access to that data currently.

There was a request for past presenters.
